

First Aid Poster Grading Tool

Names of workers

Main contribution to poster

Injury _____

			comments
Writing is legible or large type	10 points		
Describe injury	15 points		
Signs/Symptoms you would see	20 points		
Treatment in the field	20 points		
Prognosis	5 points		
Special Considerations	5 points		
Professional appearance of poster	10 points		
Related pictures	15 points		
Other related information added	Extra points		

Treatment in the field is the first responder treatment (what the ambulance ^{or} fire department would do), it is NOT what the hospital would do.

Prognosis: how well are they expected to do? Will they live, will they be disabled, will they likely have brain damage, will they recover fully with no lasting problems?

Special Considerations: Are there any special things you need to do for patients with this injury? (neuro checks every 15 minutes, call next of kin, hold injury still, use backboard)
